Summary:

A motivated Java Developer with over 4 years of experience in building scalable and reliable backend systems. Proficient in the Spring ecosystem, microservices architecture, and event-driven systems. Seeking to leverage my skills in a challenging new role.

Technical Skills:

- Languages: Java 17, SQL
- Frameworks: Spring Boot, Spring Data JPA, Hibernate
- Messaging: Apache Kafka
- Databases: PostgreSQL, MongoDB
- Tools: Docker, Git, Maven, JUnit, Mockito, Checkstyle

Professional Experience:

Backend Developer | Tech Solutions S.L. | 2021 - Present

- Developed and maintained microservices for a high-traffic fintech platform.
- Implemented event-driven communication between services using Apache Kafka.
- Wrote comprehensive unit and integration tests, achieving 85% code coverage.
